

GET TO KNOW SOUTH POLE AUSTRALIA

Global sustainability solutions tailored to the Australian market

South Pole Australia's team of sustainability experts, climate marketing specialists and skilled carbon market and sales consultants provide professional services to Australian governments, industry and corporates. The Australian team is an integral part of South Pole's global presence and is connected to our international network of experts and specialists working at the leading edge of climate challenges.

Our services in Australia

South Pole is both pragmatic and passionate about tackling climate change. We focus on discovering practical solutions to real-world climate challenges that will accelerate the transition to a low carbon and resilient economy.

We are proud to offer products and services tailored to the Australian market, from offsetting carbon emissions and related marketing, to greenhouse gas accounting, public sector carbon projects, market advisory and innovative financial solutions including responding to the Task Force on Climate-related Financial Disclosures (TCFD).

South Pole supports the public and private sectors to develop emissions reduction and energy efficiency programs, renewable energy procurement contracts and science-based target setting for policy. We also provide consulting services to analyse supply chains and find sustainable solutions. Our experts assist businesses and asset owners to address increasing demand for transparent climate-related financial disclosure, and provide advice on carbon pricing, climate finance, smart cities and scenario based climate policy for the public sector.

Our Clients

We work with public and private sector clients.

In Australia, South Pole has worked with diverse organisations including Frasers Property, RMIT, NAB, and Sendle. We have guided these companies to help reach their goals with voluntary carbon offsetting initiatives, sustainability communication and engagement initiatives, as well as offering greenhouse gas accounting, Science Based Target setting, supply chain sustainability and Life-Cycle Analysis services.

As a founding member of Climate-KIC Australia, we have brought our considerable experience from the European market and Climate-KIC Europe to assist with expanding our sector here in Australia. We work closely with members to improve climate awareness, forge partnerships to draw in local expertise for solving global and Australian issues and support innovation and entrepreneurialism within Australian universities.

"We proudly offset our staff travel and vehicle fleet every year and look forward to continuing that with South Pole."

Lisa Evans

Melbourne Airport Executive General Manager
Corporate Services

Through our majority investment in Climate Friendly and joint venture in Natural Carbon, we partner with land and native title holders in Australia to develop carbon farming projects that unlock economic, social and environmental value through the improved management of land. Combined, Climate Friendly and Natural Carbon have a portfolio of almost 100 projects registered under Australia's Emissions Reduction Fund, with around one quarter of the \$2.55 billion funding under their portfolio management.

Our emissions reduction project portfolio in Australia includes biodiversity, forestry and carbon farming projects.

Who we are

South Pole is a leading provider of global sustainability financing solutions and services. The company has over 200 experts who are mobile across our global office network, working with the public sector, corporates and civil society organisations. The company's expertise covers project and technology finance, data and advisory on sustainability risks and opportunities, as well as the development of environmental commodities such as carbon credits or renewable energy credits.

South Pole has developed and provided climate-finance to over 500 emission reduction projects in renewable energy, energy efficiency and sustainable land-use. For more information, visit southpole.com/sp-australia for our Australian page or southpole.com for our global page, or you can follow us on Twitter at [@southpoleglobal](https://twitter.com/southpoleglobal).
